

SECTION II: OUR SERVICES

Project Management Training Services (part 1)

As a consultant company in the domain of project management, *CMCCO*'s expertise makes us eligible to train people in this domain as the training provided is experiential rather than strictly theoretical. Often managing projects encompasses capacity building and training of several parties involved including our engineering team, the contractor's team and the operational staff that will take over upon completion. With such strategy in mind, once a project is initiated, needs assessment is conducted and our training department coordinates and supervises training sessions to fill the professional gaps identified.

Our Trainers are highly educated, highly experienced people. Most of them hold high positions & degrees as well as huge domain expertise. Our trainers affiliate with us starting from the initial levels of course suggestions & plan layout all through the process of development of course material & documentation. At *CMCCO*, we look at each training seminar as a project & this project is subject to several cycles of review by our training department to make sure the outcome is high quality training.

CMCCO is a professional project management & business consultants that provide professional experiential learning & training. Our seminars usually range from 2-6 days in period thereby covering a vast amount of knowledge, techniques & information in a very short time. During our seminars, you benefit by receiving a course manual prepared by professionals, proper overview, explanation of the course material & expertise of the professional trainer & certificate of attendance.

CMCCO has a prosperous history in training; over the past 15 years, we have trained more than 20,000 candidates, in different countries & locations in the Gulf & Middle East. Senior managers, project managers, directors, brokers, builders, planners, analysts, investors and many other individuals of different professional positions have trained with *CMCCO* in topics relating to project management & construction management.

Our Training Seminars Include:

Project Management Seminars

- Professional Project Management (PMP certification preparation)
- Professional Management of Project Planning with Primavera App.
- Professional Procurement Management
- IT Project Management
- Professional Project Communication Management
- Project Estimation & Cost Control & Database Applications
- Project Manager Skills

Value Engineering Seminars

- Value Engineering Analysis & Reports Presentation
