Research, Training and Development

CMCCO is a leading pioneer in Lebanon and the Middle East for intensive Project Management training seminars, which have been ongoing for more than 25 years' experience. CMCCO have trained over 20,000 candidates over GCC/MENA region by more than 150 expert speakers in their specific domains.

Project Management and Control Specialist Training Program

This training program is a unique training in the international market, which is an intensive one-month corporate training program that is intended to take candidates to another level in project management, contract management and project control. The goal of this program is to highly improve participant's skills and to be able to play a specialized important role in the top management hierarchy with the project management team.

It covers advanced skills in project management, planning and cost management, risk and contract management, disputes resolution and time extension claims analysis, change management and contract administration techniques implementation.

The methodology includes presentation sessions covering all topics, dialogue sessions for interactive discussion related to the subject, practice sessions to do the hands-on application in dealing with challenging case studies within all areas of application and support workshops to tackle further development and support to your company project documentation.

All with rich support material and help guide practical templates to save on participant long time of needed research to acquire.
